# Report overview

## Survey's theoretical framework

### What this is

The framework provides an overview of the workplace factors and outcomes that the survey measures.

### Why this is important

Based on theory and research, the framework focuses on core themes that help guide organisations in creating better workplaces.

We developed the framework in consultation with stakeholders from the public sector and Deakin University.

### Our public sector values

The public sector values inform the professional and ethical conduct of everyone who works in the public sector.

As such, these values underpin the theoretical framework of the survey.

There's a strong link between workplace culture and how staff perceive their organisation lives the public sector values.

## The public sector values that underpin the framework and all public sector organisations

# Report overview

## Your comparator group

### What this is

This is a list of similar organisations to yours.

We try to make sure they're in the same industry your organisation is in.

Some organisations may not have taken part in the survey previously. This means your comparator group may be different to previous years.

### How we use this in your report

In this report, we compare your organisation's survey results to your comparator group's results.

This is so you can compare how your organisation is doing in your industry or to similar organisations.

We refer to your comparator group in this report as 'comparator'.

# Report overview

## Your response rate

### What this is

This is how many staff in your organisation did the survey in 2023.

### Why this is important

The higher the response rate, the more your results will reflect how staff feel.

If less than 100 completed the survey, consider how much one person could change your results.

For example, if only 25 people did the survey, 1 person would account for 4% of any result.

In this example, if your survey result and comparator group result or previous survey result are within 4% of each other, there is very little difference in the results.

### How to read this

The number in the brackets ( ) shows how many staff completed the survey this year.

We've also expressed this as a percentage of all the staff who work in your organisation.
